

Launch of the 24/7/365 Manned Monitoring Environment for Web Servers, Under Partnership Agreement with BroadBand Security, Inc.

Broadmedia Technologies Co., Ltd. (head office: Minato-ku, Tokyo; President: Toshihito Kubo), a subsidiary of Broadmedia Corporation, finalized a partnership agreement with BroadBand Security, Inc. (head office: Shinjuku-ku, Tokyo; President: Akira Mochizuka), which provides total security services, and they have now begun providing 24-hours-a-day / 365-days-a-year MSS (Managed Security Service) for our cloud-based WAF/DDoS solution service.

The cloud-based WAF/DDoS solution service is an innovative solution for cloud computing that protects applications from Web attacks including the top 10 vulnerabilities of The Open Web Application Security Project (OWASP), and also takes countermeasures against DDoS attacks.

This collaboration allows us to add the SOC (Security Operation Center), which monitors cyber-attacks 24 hours a day, 365 days a year, and the Managed Security Services (MSS), which cover consulting and operation services, to the options of our cloud-based WAF/DDoS solution service, which has already been adopted at many companies, and with which we can now provide comprehensive security solutions. Providing the MSS as an optional service means that users will not need expertise and 24/7 monitoring anymore, and can receive notifications and respond to inquiries in Japanese, which will not only lower the barriers for its introduction but also reduce operational loads.

Company name: Broadband Security, Inc.
Address: Nomurafudosan Nishi-Shinjuku-Kyodo Bldg.4F, 8-5-1
Nishi-Shinjuku, Shinjuku-ku, Tokyo
Established: November 30, 2000
President and CEO: Akira Mochizuka
Business outline: Broadband Security, Inc. is a total security service provider that provides diagnostic, operation, maintenance, and digital forensic services for IT security. Under the goal of making IT networks in Japan the most robust in the world, it has supported security for IT services at various companies from major companies and telecommunications carriers to IT venture firms by utilizing high-level technological capabilities, a wealth of experience, and a wide range of information collecting abilities since its establishment in November 2000.

【MSS (Managed Security Services) 】

The MSS is a comprehensive security management service that provides SOC-as-a-service, monitoring unauthorized access and attacks on a 24-hours-a-day / 365-days-a-year basis on behalf of the representative at the customer that has introduced our security product and taking appropriate actions when an incident occurs, as well as various analytical and consulting services based on the data collected from monitoring traffic.
